Professional Summary

- Master of Information Technology student at the University of Auckland; targeting internship and junior **frontend/full stack** roles while actively learning modern web technologies through coursework and team delivery.
- Builds with **JavaScript** and **TypeScript** using **React** and **Svelte**; comfortable with **Node.js**, **Express.js**, **MongoDB**, **Tailwind CSS**, and **Java** from university programming work.
- Team-based development** using **GitHub** branching and **pull requests** alongside **Agile collaboration**; cares about **responsive** layouts and shipping UI teammates can extend.
- Practical **Docker** exposure where projects call for containers; uses **Cursor** and **Claude Code** for faster iteration alongside manual checks and structured **GitHub** workflows.

Education

University of Auckland — Auckland, New Zealand	Expected Graduation: 2027
Master of Information Technology	
Relevant Technologies: React, Node.js, Express.js, MongoDB, JavaScript, TypeScript	
Dalian Ocean University — China	Sep 2019 – Jul 2022
Master of Agriculture (Aquaculture)	

Technical Skills

Frontend:	React, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Vite, Svelte
Backend:	Node.js, Express.js, REST APIs, Socket.io
Database:	MongoDB, NoSQL
Tools & Workflow:	Git, GitHub, Docker, Cursor, Claude Code, Agile collaboration
Currently Learning:	Java, Software Architecture, Full Stack Engineering

Projects

Multiplayer Card Game Platform	2026
Team Project — University of Auckland Auckland, New Zealand	
GitHub: https://github.com/UOA-CS732-S1-2026/group-project-works-on-my-machine	
- Built responsive multiplayer game interfaces using React, Vite, and Tailwind CSS. - Developed backend services with Node.js, Express.js, and MongoDB for player and match data handling. - Implemented REST API communication and real-time multiplayer updates using Socket.io. - Collaborated in a GitHub-based Agile team workflow using feature branches, pull requests, and code reviews. - Contributed to frontend component structure, UI iteration, debugging, and gameplay interaction improvements. - Worked closely with teammates on sprint-style planning, task coordination, and iterative feature delivery.	

Fullstack Authentication App

Personal Project
React Node.js MongoDB JWT Authentication
GitHub: https://github.com/Noah-art-eng/fullstack-auth-app
Built a full stack authentication system with JWT-based login and protected routes.

- Developed React frontend and Express.js backend with MongoDB integration.
- Implemented user registration, login validation, and token-based session handling.
- Practiced REST API development and frontend-backend integration workflows.

Schedule Planner Web App

Personal Project

JavaScript | HTML | CSS

GitHub: <https://github.com/Noah-art-eng/Schedule-app>

- Built an interactive schedule planner with calendar-based task management features.
- Implemented dynamic DOM updates and responsive UI interactions using vanilla JavaScript.
- Designed a clean and user-friendly interface focused on usability and readability.

Snake Game

Personal Project

JavaScript | HTML | CSS

GitHub: <https://github.com/Noah-art-eng/Snake-game>

- Developed a browser-based Snake game with keyboard controls and score tracking.
- Implemented game loop logic, collision detection, and real-time state updates.
- Improved JavaScript problem-solving and interactive frontend development skills.

Previous Professional Experience

Regional Shrimp Farming Technical Manager

Huai'an Aohua Technology Co., Ltd.

Oct 2024 – May 2025 · China

- Provided aquaculture technical support and farming guidance across central Shandong regions including Weifang, Haiyang, and Rushan.
- Coordinated with farming teams and stakeholders to improve daily operational efficiency and production consistency.
- Managed technical reporting, issue tracking, and practical problem solving in fast-paced field environments.
- Built strong communication and collaboration skills through cross-site coordination and customer support.

Aquaculture Production Manager

Haid Group

Jul 2022 – Mar 2024 · China

- Managed daily aquaculture production operations and workshop planning to support production targets.
- Coordinated staff scheduling, workflow planning, and operational priorities across production activities.
- Assisted team development and communication to maintain stable and efficient production processes.
- Developed practical leadership, organisation, and troubleshooting skills in high-responsibility operational environments.
